

Cutaway Van Body

You need a truck that can get the job done and is built to last. That's why we use stainless steel door frames, composite doors that never fade, chip or need painting, hardwood floors, translucent fiberglass roofs that let light in, and indestructible composite liners.

Whether it's our consistent high quality at a reasonable price, or our commitment to green manufacturing, we do things the right way. Our attention to detail and quality craftsmanship are second to none. Summit isn't the biggest, just the best.
